

# Montana Field Guides

View the Montana Field Guides at:  
<http://fieldguide.mt.gov>

## Animal Field Guide

This encyclopedic website combines information from the Natural Heritage Program and Fish, Wildlife and Parks to provide detailed profiles of Species of Concern animals and other vertebrate and invertebrate species known to occur in Montana.

## Plant Field Guide

Provides detailed information on Species of Concern, Potential Species of Concern, and other plants. Includes information on species' status, general description and identification, habitat, ecology, management (where available), and distribution, along with references, technical illustrations, and photographs.

## Ecological Systems Field Guide

This guide provides detailed profiles of the ecological systems in Montana. Ecological systems are groupings of biological communities occurring in similar physical environments, and influenced by similar ecological processes such as flooding, fire, wind, and snowfall.
